Subject: Stable long distance USB runs

If you guys know of better and/or less expensive products please tell me.

I have a usb mouse, keyboard and midi patchbay.
These all need a 25'-40' run. I also plan to eventually
run 4 DVI about the same distance.

These are the products I'm looking at for usb:
 http://www.tigerdirect.com/applications/SearchTools/item-det
ails.asp?EdpNo=2893288&CatId=444

or if that won't be stable, this is lots more money:
http://www.gefen.com/kvm/dproduct.jsp?prod_id=2218

These are the long run DVI products:
 http://www.tigerdirect.com/applications/SearchTools/item-det
ails.asp?EdpNo=2815509&CatId=79

or:
 http://www.tigerdirect.com/applications/SearchTools/item-det
ails.asp?EdpNo=1643055&CatId=1163

I was hoping for a less expensive alternative. My existing USB extension
($30) is suspect. I lose
my midi patchbay within Cubase at least once in an 4-8 hour session. Often
times the computer
locks up too.

Any other ideas folks?
Tom
