Must install DirectX 9c because Sony Vegas requiers it.

Till now I used DirectX 8.1
Are there any issues with PARIS and DirectX 9c.
Which is the best DirectX version for PARIS????

Need help as soon as possible.

Thanks.

Set a ghost point/system restore point before you do ANYTHING

Then, you'll have a safe place to get back to if the install goes sour for

---

DX9c.

Of course... Ghost is my No.1 application.
I can't imagine life without it..

The problem is that I'm booked and don't have a time for experiments...
....there is nothing worse than computer related problems in presence
of clients...

Thanks and cheers.

Thanks.

....so you finally bought 3.0 software?

How much?

No, actually just trying it out courtesy of a local user here who thinks I
might buy his pro rig - I'll try to get him to take a horse! :)
cheerios!
