---

i'm burning on cheap cdrs and they seem to play great. i'm seeing C1 errors as maximum 31, average 0.23, total 992 on a single cd with 0 c2 errors.

What does this mean in laymans practical terms please and do i care? I know taiyo yudens are the bomb cd but what does this error really mean? What if the cd is going to be commercially duplicated?

Thanks.
