Hi, John.  
No it is not.  
Different chipset.  
The K8NS ultra 939 has the Nvidia 3 chipset.  
This is the one to go for.  
You may have difficulties finding it, it has recently been  
superseded. Some stores may have old stock.

Probably your best bet is to check online stores near you, and  
make sure they have stock.
