OK, I haven't been here for a while, and didn't even know this place still existed--but I'm glad you're here!

So how do I get a hold of these new drivers?

Any caveats?

Also, is there information relating to using Paris with UAD-1? I haven't tried this in a while.

I have just started working on some mixes in Samplitude but think it might sound better in Paris...agreed?

So show the way to Mike's drivers.

Thanks,

Ron

I've just got a sec for a quick reply, but you can click the "mikeaudet" link in the header up at the top of this page. Mike's work is very polished and the drivers seem to be working like a charm for most folks - stable as a rock on my system.

No Problems with the drivers

I'm using the UAD-1e cards and have had no real issues except for a delayed start up after hitting the play button.

edit: and the ugly interface when using the wrapper

Ron

Hey Ron. I have a purchased copy of Mike's drivers that I'll sell you and it will be cheaper than buying new. Mike already told me I can transfer the registration easily. I don't use Paris anymore and no longer need them. Up to you, but if you are interested, email me: darbyohara at hotmail dot com
