Here you go...

David.

/It makes sense. The local Sam Ash tech who is pretty smart, suggested I be careful to keep the batteries up to 9 volts and use a meter to make sure of it. You mention below that you use a series parallel switch. Is that so you can use one battery if you need to? Could you 'splain me how that's wired?

Damn, I love this N/G. We got some smart and talented folks here in Casablanca.

W. Mark Wilson wrote:
This information came straight from Overlend Corp techs (who at that time was EMG).

WMW /
