http://www.txmicro.com=20

(245) 16MB Matrox G450 (Dual Monitor) 4x AGP Video Card --1+ $ 7.49

These should load up in WinXP w/o and drivers from Matrox, and that's =
how I recommend you do it. I'm posting this mainly for the Win ME/98 =
crowd though.... seemed to play much better in that OS. This is not the =
same as the 32Mb version of this model but if you've been counting =
pennies to go Dual Monitor or already have one and need a backup, this =
is probably as good as it's gonna get for those situations.=20

PS: I only started buying from this vendor recently, but I've had no =
troubles at all so far and they deal with older (ahem.. vintage) =
computer parts mostly that I can see - which is perfect for a Parisite.=20

AA

I choose Polesoft Lockspam to fight spam, and you?
