Has anyone using Liquid mix 16 with Paris? Anything special to get it working? How is the latency - any issues there? I saw a post awhile back but it was not updated with how well it worked etc.

Thanks!!

I while back, I got the original LM to work. But since I use the FW out on the PC to feed an external M-Audio box for other ITB software, I don't use it anymore. I seem to remember having some issues when tried to use it last time, and since I use other plugins, never pursued it further. If I get a chance I'll check into it again...
