Subject: Ok who wants me to do some testing
Posted by Chris Ludwig on Sun, 01 Apr 2007 16:46:27 GMT

Hey Folks,
Ok with Gantt's current dilemma of trying to use the newer UAD stuff.
I;m getting the itch to see if I can get Paris hardware/software to work
well on new PC hardware.
I obviously have access to the PC hardware stuff and I have PCI-e and
PCI UAD cards to use (we build some of UADs in house test machines).
So if any wants me to take on this test I'll need some Paris stuff sense
I don't have anything now.

Here is what I'd need as a minimum.
2x EDS cards w/ sync cables
2x MEC with data cables
2x C-16s
Fxpansion 3.3
If anyone wants the XP ADAT issues tested then I'd need some ADAT cards.

Thanks,
Chris

I might be able to do the two adat cards shortly...i.e. within a couple of
weeks...and if I can do the ADAT cards I'll send along a MEC as I won't be
needing the second one if the ADAT cards are gone.

Two questions...where are you located and about how long will you need the
gear

DOn

Chris,

I have a MEC and an ADAT card here I can send you. Nobody wants them anyway.

;o)

I have a spare EDS and a C16, possibly a second EDS...

I can come up with an EDS card and a C16 and I
have the FX Expasion somewhere...
