Subject: XP Paf converter
Posted by Wayne on Thu, 07 May 2009 22:22:54 GMT

Hello guys and gals,

The current XP paf/wav converter does 24 to 24 bit mono files and 16 or 24 bit stereo file conversions both ways. The older Win98 converter (if I remember correctly) also did 16 to 16 bit mono file conversions.

I tried the XP version on a 16 bit mono file conversion and got screaming noise. Is their an XP app that'll convert 16 bit mono wave to paf?

Thanks,
Wayne
