Hi All,

I've been hard at work (as usual) cooking up more PARIS goodies for 'yall, and I think I've got a good one this time.

The PARIS DeEsser sounds awesome, and it's easy to use, too.

Thanks so much to everyone who has donated to this. It has been a big help.

I'm currently taking a day a week off work in order to do this (every Monday) - which is my choice. I love this shit, and I've wanted to do this forever.

But, it's expensive. It's costing me about \$200 a week to make these things - which is my choice. But, if you do enjoy these plugins and find them useful, please help me pay for this! I'm seeing dozens and dozens of downloads and far, far fewer donations.

As always, you can download the plugs at my website: [www.ensoniq.ca](http://www.ensoniq.ca).

Enjoy!

Mike

Hey Mike !!  
Thanks !!  
I have just donated some more for you...  
I didn't have the time to check your final compressor version but am sure  
its just as should !!  
Regarding ducking how does this work on connection ??  
Regards,  
Dimitrios

Thanks, Rob. I hope my post didn't sound ornery. I've been so excited about doing this that I've been having trouble sleeping. I wake up for a second in the middle of the night and think of a way to solve a problem with a plugin

I'm working on, and then I can't get back to sleep unless I get up and work on it for an hour or two.

I'm really, really proud of these, though. I can't wait to get a couple more done and move on to the driver.

All the best,

Mike

Hi Carl,

Now that I can read the EDS assembler, we could (If I knew how to write VST plugins) port the effects to native form. That would be very cool. Time will tell. :)

Thanks, Mike. You are appreciated.

And, after we get back from Vegas next week, I'll throw some money your way. The little woman usually ends up in the black, so we should have few extra shekels in the toy fund.

pab

Thanks Mike. Great stuff.  
Could have used this last week. Don't like tracking with a de-esser, so this will reduce the fatigue factor during extended vocal sessions.  
Haven't tried it yet, but a donation has been made.  
Keep up the good work.  
Kim

Thanks so much, Kim, and everyone else that send kind words and cash my way.  
:)

I just got a copy of Code Warrior, and I'm hoping to get some Mac plugs going as soon as they will compile.

I'm also hoping to get some sleep! I literally can't stop working on this stuff. My brain just won't leave it alone. I woke up at 6:15 this morning with a sudden realization that an equation in some comments was the algo I need to make a crossover.

I really look forward to hearing what you guys think of the deesser. The other plugs were all stuff I found and fixed up or combined. This one has unique code that I wrote in EDS assembler, so I'm pretty stoked about it. (Of course, I also grabbed stuff from here and there, too.)

All the best,

Mike

Hi Tom,

\$25 a plug is very generous. I'm sorry I got pissy this morning. I'm feeling better now.

I'm really looking forward to what people think of the deesser.

How are things going with your Magma?

Hey Mike, I have an old version of Code Warrior from the late 90s around here somewhere. It's an NFR that was never registered. If you need it let me know.

James

Hi James,

I may take you up on that. I just got a copy of version 9, but PARIS may need an older one. I'm emailing everyone I can think of to get some advise on how to make it happen. I'll let you know what I find out.

All the best,

Mike

I have an old G3, but I'm missing the keyboard, mouse, and VGA adapter. They'll either turn up, or I'll find a way to replace them. There may be an extra one coming available from work, now that I think about it, and it's a G4. Hmmm....

Hi Mike-

Sorry I didn't get back to you last night. Yes I can get you the kb, mouse etc...

Let me know when you're ready to go, and I can meet you somewhere.

Hi Frazer,

Right now, they just work on PC, but Mac versions are in the works.

All the best,

Mike
