I created a 40th anniversary slide show for my in-laws this weekend complete with pan/zoom and music using this free app called Photo story 3 from microsoft. I'm not one to brag MS but this simply blew me away with how simple and creative it was.

Just google it and download (using an authenticated win install of course...!!)

Rob

Here is a low rez, reduced lenght version for reference. I'd been looking for an app like this for quite a while and its free to boot.

Another very useful and free tool is wink

<http://www.debugmode.com/wink/>

which has the additional advantage of working on that funny linux operating system thing.

Nice work Rob...quite cool. I recently purchased Pinnacle's "Studio Plus"...\$69.00 + \$20.00 rebate. Looks pretty cool as well, but you can't beat "free" for what you did!
