Hi There.

I just bought another EDS-card and want to use both, i understand that you need to connect them together with wires.

Can someone please tell me how to do it and if someone have a photo that would be so much help.

Waiting for reply.

Pelle/Sweden

Register for the wiki page (<http://www.kerrygalloway.com/WikiPARIS/wikka.php?wakka=HomePage>)

And you can download the reference manual. The card interconnections are shown clearly there. I don't mean to be an RTFM sort of guy, but a proper drawing necessary. You'll end up crossing 2 of the ribbon cables together when it's done right.

For a 2 card setup IIRC you'll connect 3 ribbon cables (one is the clock signal from the master-card).

Cheers

Kris
