---

Hi my fellow PARISIANS,

I am still happily using my PARIS setup through the XP Platform, and I would like to get some new plug ins, such as the WAVES Platinum bundle, but it cannot be used with my Windows XP setup.

Does anyone have any suggestions? I am using the native PARIS plug ins as well as an old version of WAVES, but I am specifically looking for a quality vocal doubling plug in, such as WAVES DOUBLER.

Appreciate any input.

Tom
