Deej and anyone else who would like to add to this, I've been doing a little reading about the SSL Duende and have some questions about the piece. I'm not clear on a few things.

1. It uses only its own DSP right?
2. It works as a host compatible VST plugin within Paris right?
3. Is anyone using it with Paris?
4. There shouldn't be any latency issues right?

Thanks,
Rich
