Hello,

Any Paris users using Mac OS 9 plugins (vst's etc etc? Would you know where I can find some interesting plugins for OS 9?

Thanks,

I still Paris on OS 9. I use Waves - Gold Bundle, v.3.2. Also have a UAD-1 card or two but I seldom use their plugs anymore. The latency is a hassle and there are some weird bugs. Just not worth the aggravation although they do sound nice.

Yep. Blockfish was a great little compressor. I also used some of the free MDA plugins, particularly Combo which gave me access to some nice "degraded" or "radio voice" FX.
