s

Hi Dennis... I have a pro (Blue) MEC that I have for sale (it's posted).

Let me know if you're interested... make a me an offer!!!

DanHi,

Direct trade for Mackie mixer-mixer, a great tool for Paris users cause it can combine your mecs' analog ins and outs for common monitoring or aux effecting.

I pay the shipping for the Mackie mixer to you (which is higher than of a card) and you pay for the card to me.

Let me know.

Regards,

DimitriosDennis,

We had a deal - then you backed out when you found out that the shipping to the Netherlands via USMail, was \$105. I've tried to contact you to ask you if you still want the MEC / input card that I've got beautifully packed and ready to roll, but I haven't heard back from you.

What's going on? I kinda feel screwed here, because I've already paid to have it well-packed for the trip.

Sandy

Hi,<=
BR>Can=20

you please estimate shipping cost to Thessaloniki Greece with USPS=20
airmail
(not global express) for the IF/2 or maybe both=20
?
Regards,
Dimitrios

I'm moving to an RME MADI/ADI 648 system with an AES 32 card so this =
stuff has got to go.

3 x RME HDSP 9652's - \$425.00 each

If you want to sync a sequencer to your Paris rig, this is the card to =
do it. I'll guarantee it to slave to a Paris ADAT card if you're running =
Cubase using ASIO positioning protocall. I did it for three years.=20

Frontier Designs Apache Optical Patchbay in "mint" condition. I had it =
racked for about a month, then decided to go a different route to it's =
basically NIB- \$500.00.=20

Unlike the older Digipatch, this one will pass 24 bit.=20

Here's an accurate review:

<http://www.proaudioreview.com/pages/s.0032/t.3472.html>

RME ADI 4-DD - this is a very cool ADAT>AES format converter (works with =
S/PDIF too using an XLR>RCA adapter). You can take an ADAT I/O and =
convert it into 4 x stereo AES I/O. Included is a a 20' long TDIF>4 x =
AES M & 4 x AES F connectors.- \$550.00

If you need more stereo S/PDIF I/O and want to integrate some AES or =
S/Pdif connected gear with your Paris rig, this is definitely the =
ticket.

<http://www.rme-audio.com/english/adi/adi4dd.htm>

The little trapdoor dust cover on the ADAT output came off this unit. =
That's the only flaw with it. I'm going to try to get a replacement from =
Synthax tomorrow.

Any/all of this stuff guaranteed to work perfectly. I'll refund anyone's =
money who isn't happy.

Last call before EBay.

Deej
