---=_linux43841dc9--It's alright. I worked it out.

I now have a second group running which can't see the Paris group on the web interface, unless they go to the groups search and type in Paris, but ya know, what are the chances...?

NNTP users of this group will still see the new group appear, but they can ignore... ..or join in. ;o)

Cheers,
Kim.

Indeed he does, and is on the beta test team far as I understand.

He raves about it, and has demo'd it to me over many hours, and I must say
it is extremely impressive, and sounds great to my ear.

Cheers,
Kim.Dear Gene,
After a quick read I ahve some questions if you don't mind.
You record in DP using your Myteks at 96khz, right ?
Then you say you are submixing inside Paris... how do you do it when DP works
at 96 and Paris at 44.1 ?
I missed something here...
Next you are saying you though 20bit adat had some drawbacks , now it doesn't
have ?
Can you please explain how Paris adat now sounds ok with no hearable degradation
?
Regards,
Dimitrios

Could easily be Texas, too!

mcYes, but where's the kangaroos?-)

Have two danish grandchildren that's coming back to Denmark from Australia after being there with their father for 5 weeks. Don't know where yet.

They're 10 and 12 years old. I think I'll send them the picture to hear what they're saying ;o)

>So for those who aren't aware or don't remember I was talking to a buddy who is building a new studio.He wanted me to start working out of there and I probably will.Right now I like the idea of having a place away from the house.Having 4 year old twins around makes the recording/mixing schedule much less flexible in the basement at the house.In addition I'll be gaining access to nice bigger rooms and more gear.

The site for the studio is www.musiccreekstudios.com if anyone cares to look. You can click on the picture and it will bring up some more pics; preliminary site right now.

Anyway it is a Neve VR and hes doing the PT thing mixing back out through the Neve. Right now I'm trying to figure out how/if I can incorporate PARIS into this scenario. Reading Gene's post on his new setup I'm wondering if this might work: tracking through the Neve to PT, then back out to the Neve and analog gear, then into PARIS.

But then I'm dealing with TDM plugs in PT which maybe defeats the purpose. I could track to something else I guess besides PT, but that might complicate matters as he will always do PT.

Whatever I do I like the idea of being away from the house with bigger rooms (the drums sound really nice in there) and some higher end gear to learn a little about. I think my C7 will sound nice in there. Maybe the VR is redundant now a days, but it can't hurt to get some time in on a board like that I guess.

Any ideas on this whole outboard analog/DAW thing in this situation greatly appreciated.

TIA,
Pete RuthenburgRoo? Where's Steve Irwin? ;>)

Wow! Well I am glad to hear that the product sounds better than the demos. Just goes to show you once again, as with PT's, you can sell something to people even if it (apparently) sounds bad if they like the booth girls! Or if they are told "everyone" is using this...

What a business we are in huh?

DC

and you have to wonder what were they thinking? Hey let's have crappy sounding demos, and our pro users will straighten things out for us... yipesWhat version of PT does he have & which convertors?

Why don't you record to the 2", then bounce to DAW?

Neil

>Pete RuthenburgIn the A room its a Mix plus system.His reasoning is since hes
not using the PT mixbuss its cool.He is going to go over to HD
sometime though;I think he has to really.

Hes building a smaller B room and Hd will probably go in there
first.Hes using the Apogee convertors right now.

As soon as the 2" is up I was thinking of tracking to that
then transferring so that is definitely an option.Having never
dealt with tape it was just something else for me to grasp so I
was leaning towards tracking to DAW at first.

Thanks for the questions Neil;keeps me thinking.
