Technology sucks!

I just voted, well I think I voted??? The scantron style voting machine
stopped working at 1:30. We had to stuff our ballots in a slot on the side
of the machine. The women that were working there didn't really know what
to do. A women was on a cell phone trying to get help, and the person on
the other side on the line kept telling her to keep trying to put ballots
in the machine. The machine was spitting them out and saying that it was
a possible folded ballot and to try again. They tried about 30 ballots,
and all they would get was errors. It was odd that the machine stopped right
at 1:30. There has to be a better way.
