i mix in nuendo and send up to 16 stereo groups (sometimes) to paris to do the summing.

i have a REFERENCE stereo group that also runs to paris.

i've been using the new paris buss compressor more lately. (thanks mike)

aside from getting a central station.... is there any way possible to hear my reference group without going through paris' global master. i want to hear my reference material without the buss compressor.

ie... i have the mix working in nuendo.... i want to a/b with my reference so i solo the reference track in nuendo... but then i have to switch over to paris and bypass the buss compressor.... yuck. i want instant a/b reference without the distraction of switching screens, bypass, switch back, un-solo, switch to paris again, undo bypass, switch back to nuendo.... YUCK YUCK YUCK!

i don't think this is possible without a central station or external mixer (adding color yuck!) or a/b box.

but some of you technical wizards might think of a way.

thanks.
