Hi All,

I just finished the a PARIS version of the hall reverb from the DP/4. I'm not sure how much it was changed from the original when it was ported to the ESP2 chip, but it sounds incredible. You can load 4 instances of it on one EDS card.

You can get a copy at www.ensoniq.ca.

Next stop is the vocal plate.

All the best!

Mike

Woot, nice work! Wish I had my rig to check this out. Top of the priority list though when the rig arrives; previously the PARIS verbs were something I always augmented with external units.

Hi Mike,
I will be trying it asap! The plate has been my usual go to with added eq and/or chorus from time to time. This sounds like a welcome addition since I never liked the other verbs we have to choose from. Four on one card? Not too demanding=20 either. Nice!

Thanks for the ambience,
Tom

Hi Rich,

the plugins are all "pay what you can" feel free to pay whatever the upgrade is worth to you.

NoLimit was one of my first efforts - it was a lot to tackle at the time, but I agree that it's not as big of an upgrade as the newer ones.

Anyway, feel free to send me whatever.

Also, I just filled in a form to get past your spam blocker. Let me know

if that doesn't work. your reverb is attached to the email I sent you.

All the best!

Mike

This is just too cool. I'm going to pick up a couple of these plugs this morning and check them out. Thanks Mike for your dedication.

Mike, I bought No limit when Chuck originally wrote it. Was wondering if I
buy a couple of other plug ins, do you mind if I download
No Limit for a little less?

It's been a long time since I added a new Paris effect

can someone copy those install instructions and paste em here?

I'm excited to try this new verb

OK we have the three existing Paris reverbs that were . . . ok. Plate being my favorite usually but not really that great without some = doctoring.

THE DP/4 HALL REVERB THAT MIKE PORTED OVER IS THE S & % T !

The DP/4 Hall is what we've all been waiting for as an EDS verb. A noticeable stereo spread with stereo inputs too. Sweet long tails, short tails without the 'ringing' , lots of easy to = use parameters for early reflections, panning, low end decay, etc..

There is no question this one is worth every dollar you can muster up.

If nothing else, I'm going to turn PARIS into one hell of an effects box.
:)

There is a lot more to come. :)

Hi Cujo,

The instructions are at the top of the page at www.ensoniq.ca. Kerry has a pdf on his site, too.

Cheers,

Mike

I've created a pdf out of the document and added a link to it at the blog in the "Welcome Mike" thread. I also put a permanent link to it in the "PARIS Links" sidebar for organization.

<http://ensoniqparis.blogspot.com/2008/03/ensoniq-paris-blog-proudly-welcomes.html>

Hope that helps...

Perfect thanks.
Although my Paris is PC, my internet is on a Mac and the other file did not open.

Can you hint on that new development???

Not yet, but it's on the todo list, if only to fix the time/sample rate bugs.
