I know the 163 and the 166 share the same VCA (except as noted) and =
these
both have different envelopes-of-attack from the 161. This has a lot =
to do
with the overall sound.
I shou

Id point out that the person who told me about some of the early =
166
boxes was not from DBX, but was a technician that I trusted and he =
should
have known. I could be wrong about this.
You should be in a good position to listen to the two units side by =
side.
This is really the best way anyway, particularly since many of the =
older
units are way overdue for a rebuild/recalibration.
Looking inside is not always helpful. The early VCAs are not always =
labeled.

The attached image looks generally like most of the early VCAs.

Hehe, well the guests room is kinda filling with boxes at the moment, courtesy
of being the unused room currently, but there is a guests room, and it has
a queen sized bed in it. I still need to aquire bed clothes and stuff for
it (the only doona I have spare is only a double), but yes there is a guests
room, so if you're ever in Melbourne chuck me an email. :o)

Cheers,
Kim.

Well, you were talking about running around naked. this big window looks sort of like the display windows of the brothels in Amsterdam.....so maybe you could.....errrr.....

BTW, prostitution is legal in Melbourne, so it may be a good way to get some extra cash...get a good looking chick, (hate that expresion), to sit in the window all day, the guys come in, and you could sell them some studio time, especially after they've been "rested"
