Thought I'd add some pics of our new studio being built, in the country NE
of Toronto.

The space is a new construction including garage, live room, control room, storage, foyer and a 2 piece bathroom.

Live room is 19' x 32' with various ceiling angles. Height is 10' for 2/3 of it and 15' at the peak.

Control room is 16' x 14' with guitar cab iso (and bass trap) at the rear and 10' ceilings.

Flooring is concrete sub with radiant heat, and hardwood top.

Ceilings will be rough cut soft wood planks. These shots are just before spray foam insulation. It sounded great when it was just the framing. Now that it's closing in a bit, we'll need a fair bit of absorbing/diffusing to control it.

I think studios (particularly control rooms) are forts for grownups.

Ted

LOL. I think you're right! :^)

Congrats on the new studio, Ted. It looks like it will be an inspiring
space.

Cheers,

-Jamie

Beautiful, striking space!

OK, I just renovated my one-car garage to be a studio here in Vancouver.

Major envy here :D

The main thing is - what does the end result sound like?

This is not my space - it belongs to our Keys player and her husband, who is our Sound Man. They have 500 acres in the country. Someone else here said "I don't have a lot of money, but I have friends who do, which is the next best thing"

Hey Kerry - Thanks so much for all the work you're doing for the PARIS community.

Ted

You're welcome, Ted - though it's hardly altruism, I get to play with
all the new developments too ;)

The hero of the story is Mike Audet. We'll look back at the development
work he did in 2008 as a turning point for the continuation of PARIS,
like the release of the XP drivers in '03 was.

Nice stuff Ted. I'm glad for you. Now comes the fun part...

Wiring...

Grounding...

Deciding exactly what to do with the acoustics...

oh, and don't forget the patchbays.

yikes

I love this stuff actually....

Oh, and if you do decide to bury a steel plate, make sure you run a wire to it! ;-)

David.

6'x6' Steel plate buried below the frost line should be a good
start in solving it, if you haven't done that already.

Cheers & best of luck with the new place!

Just thought I'd stop in since it's been awhile - glad to see
there's some actual audio being discussed... how're all the
rest of you Parisieners doing? Good, I hope.

Neil

WTF, David? Are you trying to ruin my studio-withcraft-mojo thread here??? You don't EVER wanna run a wire to it!!! Look, here's what you do...

- 1.) You just bury a 6'x6' Steel plate below the frostline, and then you're done.
- 2.) As an ALTERNATIVE, you can bury a 6'x6'x Steel plate under the frostline, and then light a candle, and chant a bit.
- 3.) As a SECOND alternative, you can bury a 6'x6' Steel plate below the frostline, and then connect it via wireless (such as a Frontier Transzport) to your cold water pipes. Oh, and don't forget the whole candle, chant, chant, etc, thing.

But don't EVER connect a f*ck*ng WIRE to it! lol

:)

aren't you the guy that buried the old Buick in the yard for a grounding
electrode?
