Wow, i've been away for a couple of years. So glad to see the community alive and well.

I have created click tracks for years (as suggested in the many FAQs and tutorials I've dnld from Paris newsgroups) and it has always worked just fine.

However, for some reason the grid lines are never visible and when I paste multiples I get 64th notes. Minor time divisions is not turned on and I'm at 4|4 120bpm just to test.

Anybody have any ideas? I really don't want to uninstall and reinstall if I don't have to.

I appreciate any suggestions
thanks
