There may be no direct Thunderbolt-to-old-style-PCI chassis yet, but as the ExpressCard version of Magma chassis is plummeting in value this will be an interesting option to investigate:

[http://eshop.macsales.com/item/Sonnet%20Technologies/ECHOPRO E34/](http://eshop.macsales.com/item/Sonnet%20Technologies/ECHOPRO%20E34/)

Basically it gives any Thunderbolt-equipped Mac an old style ExpressCard/34 slot for \$170.

So is the Virtuavia expansion thing officially dead in the water?

I've contacted Virtua Via a bunch of time by email and phone, and they have not replied. I think they're out of business. It's too bad because my chassis is working great.

The express card option is a good one. Thanks for checking into that, Kerry!

I stand corrected - I contacted Virtua Via one last time, and they responded. The Virtua Via expansion chassis is still available!

Here's what they wrote:

>>Hello,

>>

>>Yes it is please order on our website www.virtuavia.eu

>>

>>Best regards,

I'm not sure what the dead air was about, but they seem to be responding again.

I hope this helps.

Mike
