strated with my system. Did a nice overhaul=20
recently so now I have to learn too much too fast and some of it is like
    crawling over broken glass to get happening.
The guys I deal with down at Saved By Technology are constantly=20
genuflecting droolingly over PT which has kind of hyp-mo-tized me....

Martin Harrington wrote:

   Yukkk,
Don't do it..PT I mean.
I've just been playing with PT M-Powered 6.8, using my Delta 1010, and
    I=20
  have to say...I don't like it.
The interface is (IMNSHO), horrible, confusing, and convoluted.
Moves that come easily in Paris, and more easily in Nuendo, are tiresome
    in=20
  PT, apart from the reagon tool...taht has always been good, right from
    the=20

Session 8 days, but not much else.
And..it only plays .MOV video files, which in my case is a no-no, (the
    full=20
  TDM version may play the others but I don't think so).
To top it off, playing one of my projects from Nuendo, (reassembled), it
      didn't have the "life" that the original had, by a long shot.
I repeat...don't go there, Jeff......
