Subject: PARIS won't boot (error message)

hi all,

It's been a while since I posted here...I've only sporadically used my PARIS
rig in the past couple years (1 card/MEC/24-8 in/out on a dedicated MAC G4
Quicksilver). Never had problems before, but today PARIS won't boot up.

I get a 'Error initializing PARIS Engine Error code -43/fffffd5

Tried replacing config file, reinstalled PARIS on another drive, cleaned
things up, etc all with the same problem. Help!
