This is the AC adaptor for the GC8 controller for the Roland R-880 reverb.
It's a line lump unit.

The one I have here is Model ACB-220 No 12449549

Can't seem to locate one here in the US as Roland US is about as worthless
as teats on a boar when it comes to legacy support.

If anyone has a line on where I might find one, it would be much appreciated.

Thanks,

Deej
