Crazy new RME gear Coming Soon

## HDSPe RayDAT

The HDSPe RayDAT provides unique features:

- \* 4 x ADAT digital I/O, supporting 192 kHz via S/MUX4 operation
- \* 1 x SPDIF digital I/O, 192 kHz-capable
- \* 1 x AES/EBU digital I/O, 192 kHz-capable
- \* 2 x MIDI I/O, 32 channels high-speed MIDI via breakout cable
- \* Up to 36 inputs and 36 outputs can be used simultaneously!
- \* DIGICheck  
< [en\\_support\\_techinfo.php?page=content/support/en\\_support\\_techinfo\\_digicheck](#) >,  
RMEs unique metering- and analysing tool
- \* TotalMix: 2592 channel mixer  
< [en\\_support\\_techinfo.php?page=content/support/en\\_support\\_techinfo\\_hdsp\\_totalmix\\_hardware](#) >  
with 42 bit internal resolution
- \* Native PCI Express - no PCI to PCI Express bridge used
- \* S/MUX poured in hardware: 16 channels 24-bit/96kHz for record and playback on ADAT optical

If only they made RayDAT 6 x ADAT, I would have been there. MADI for a laptop is very cool.

Hi Graham,

They do. :)  
Its a HDSP MADI and and ADI-648.

But Chris, that's \$4k for MADI + 648, and all just to up the single card I/O count beyond 3 ADAT ports (Digiface). I agree - the RayDAT is basically a Digiface with one extra ADAT port and an AES. What the heck are they thinking putting out marginal variations of the same theme??

I'm with Graham - a 6-8 x ADAT-only PCIe interface and breakout box with wordclock (ADAT only Digiface) would be far more useful for me. Pretty disappointing RME hasn't done this yet - not that Lynx is pushing the high ADAT I/O options either though.

If MADI can handle the channel count I don't see why a dedicated pigtail from a PCIe interface to a breakout box couldn't.

True, but I don't like spending more on the digital interface than I do on converters...

That said, I still love the Digiface. I just wish they made it single-card expandable like the MOTU stuff. Apparently few others in the user base asked.

;) )
