Anyone played with Waves S1 Imager and Roger Nichols Stereo Analyzer? You can use S1 to reverse channels and put all left or all right in both channels and with Stereo Analyzer you can see how much correlation there is between the left and right channels.

It's amazing how much stereo imagery you can get with stuff that's 98% correlated (example: moonlight feels right). The mix is pretty mono with rhodes left and vibes keyboard right. DOubled vocal in mono! Kewl stuff. Here's another one for your comments. Load the song up and tell me what you hear.

Canned Heat Going up the country

flute copied with delay in left to thicken
eq left: roll off all lows eq right: roll off all highs

doubled guitars with delay in left to make 2 distinct guitars
very lo fi guitar rhythm left very lo fi guitar left octave lower
eq left: roll off all lows eq right: roll off all highs

bass / drums center with narrow image just off center

vocal dead mono ! heavy compression?

Here's a couple more:

Rolling Stones: It's only rock and roll

acoustic 10 o clock electric 1 right rhythm
electric 2 right lead

electric 3 left electric 4 right

5 freaking guitars !!

Neil Young.....Old Man

Guitar panned 90% left
Vocal center, more verb in right
Bass center
Piano center very quiet

banjo comes in left
slide guitar with nice reverb center mono

Stereo vocal harmonies

Share your own !! Thanks

John,
Try Hotel California. I think there are between 11 and 13 different
guitar parts/sounds on that by the end but no clutter. =20

When I saw them do it live in 1993 it was just Walsh on electric, Felder on

double neck 6/12 string electric and Frey on a Takamine Electric/acoustic 12 string with a a sideman playing a B3, Schmidt on bass, Henley on drums. It sounded HUGE because the sound guys had delays , etc. going all over the guitars. One of the best live concerts I've ever seen in my entire life.

Anyone know who engineered and produced this one? What kind of tape machines would they have had in 1975? It sounds great.
fernando.
