Hi Lamont,
Sorry to here your having trouble.
What exact model of the Gigabyte board do you mean. The description you have here is vague. Is it a K8NS Ultra -939?

When you say you rebuilt do you mean you reinstalled windows from scratch?

Hi gang:

I 'm having problems getting Paris to ip and running. Paris will sometimes star, only to just freeze up and crash the whole system. So, I thought my Asus-Amd XP combo(with SATA-Firwire) was cause too much IRQ problems for PAris.

So, I rebuilt with my favorite stable mobo(Gigabyte).

Here's the skinny: I just build a new Paris/Nuendo PC. Great very very fast:
Here are the configs:

- gigabyte mobo 939 Ultra250
- Dual core opteron 165
- 2gig ddr400
- sata (onboard) 3 300 gig drives
- (1) RME Digi 96
- (1)Magma card (4 card EDS)
- Matrox g450

Well, Nuendo runs like a Deer!!! WOW.. But PAris is hit and miss. I disabled: USB, SATA raid..A little better, but I', starting to think that My either my EdS cards or Mec/442 are the problem. Just 2 weeks prior, the system was working fine.

Note: In my studio I have a master power switch that start up the FUrman power unit..The Magama and Mec units were on when I started up the system. Maybe PAris got a Jolt ??? I don;t know..
Please help..Thanks

LaMont,
EDS1 with Matrox is a bad thing. I'd try different slots within
the Magma to correct that. Have you tried any other slots on
the mobo for the Magma card? That might be the first thing unless
you know that won't help.

Tom
"LaMont" <jjdpro@ameritech.net> wrote in message =

HEY Tom,
I'm in the Prcess of moving th magma card to differnt slots..I'll let you
know what happens..

Subject: Re: Paris Problems on new machine: HELP!!!!
Posted by [LaMont](#) on Wed, 01 Mar 2006 15:10:45 GMT
[View Forum Message](#) <> [Reply to Message](#)

Tom & Chris,

I got it solved. It was the Magma Chasis's power supply was not "seated" into slot properly. Paris is working fine now.
Thanks

LaMont,
I'm glad it was that easy!
Tom
"Chris Ludwig" <chrisl@adkproaudio.com> wrote in message =
news:4405b024@linux...
Hi Lamont,
Wow weird stuff. Glad its working now.

Chris

Subject: Re: Paris Problems on new machine: Hey Chris Ludwig...!
Posted by [Miguel Vigil \[1\]](#) on Wed, 01 Mar 2006 16:32:21 GMT
[View Forum Message](#) <> [Reply to Message](#)

Hello Chris,

>> > not Standard PC. Mother Board GA-K8NSC-939

re above mobo, which does not have the firewire i/o,
is there any major difference to the more expensive and
elusive K8ns ultra pro you have touted?

TIA,

EI Miguel

Subject: Re: Paris Problems on new machine: Hey Chris Ludwig...!
Posted by [Chris Ludwig](#) on Wed, 01 Mar 2006 18:58:23 GMT
[View Forum Message](#) <> [Reply to Message](#)

Hi Miguel,

Yes quite a few differences.

The K8NS Ultra-939

nForce3 Ultra chip set 2000 mhz FSB
4 x sata ports 2 of which are integrated on the Nvidia chip set.
2 x lan both gigabit 1 is integrated on the nvidia chip set.
3 x 1384b (2x 400 1x 800 ports)
Dual_BIOS

The K8NSC-939

NForce 3 250Gb chip set 1600 mhz FSB
2x sata ports
1x lan
no firewire
no dual bios

The only real major difference is the slower FSB.

Chris

Chris,
I tried to purchase the Pro board but could not find it.. Maybe for the best,
to many things to disable. :)
