Hi There !

Have someone a working Paris with Ex1095 Card and Expansionchassis EX1031.
Since i have installed this configuration, to use a 4 Card system, i get only Blue Screens. Paris don't starts. In systemconfiguration i can see, that is every card ready.

I am using win premium with 32bit.

Each EDS draws between 20 and 25 watts.

I hope this helps.

Mike

Hi Mike !

Thx that helps and fast answear !
I have wondered myself, if the Powersuply of Expansion had have enough power. The system don`t run with 3 Cards. My PC is frozen after start Paris , with 3 EDS Cards. The PC runs with 2 Cards.

This issue i can put off my List :

-> Expansions Chassis Power Supply 220W -> Blue Screen

-> Change the Port of the Connectioncard -> Blue Screen
-> Take off all VGA/ UAD2 cards -> Blue Screen
