I did this a long long time ago and have to do it again. Can't remember for the life of me the procedure and I don't want to screw it up.

When asked 'where' to install, what 's the drill?

Is there a "step-by-step" in a faq somewhere?

Thanks for any help here.

Jim

<http://www.parisfaqs.com/>

Right at the bottom of the "PC Specific stuff" is a link to the XP install instructions and drivers.

David.

run the setup app to install the scherzo drivers, reboot, then install Paris, reboot, then the effects subsystem, then reboot.

www.kfocus.com/paris under setup / XP

Thank you so much for the tips! Apparently I'm back on the block.

Everything is acting normal.

Uh, one boot at a time? 8>)

Best Regards, Jim
