Subject: missing fx library
Posted by jp on Mon, 12 Jun 2006 18:22:13 GMT

HI all--
somehow I lost my library of effects when reloading paris--
don't ask me what i did-- moved something somwhere where
i couldn't retrive it i guess--
how do i get my library of FX back into my system and still retain my presets(which
remain in the projects themselves)?
thanks
jp

Globals are in PARIS_FX.VAR.   If you have them in the projects you can load
the project and move them to globals.

LIBRARY presets are saved in the PARIS_FX.VAR file
 in C:\Program Files\Paris3 (your Paris root dir).

PARIS_Fx.var (Default) is a backup of the file
 PARIS_Fx.var that gets modified when you make library presets.

John,
thanks for the explanation...

am i correct in thinking that i can rename

my PARIS_FX.VAR(default) to read PARIS_FX.VAR and
use that to replace my current PARIS_FX.VAR file and
find the librtary of missing FX? do i need to
do something particular to avoid losing my own presets?

thanks again,
jp

Your global effects were in PARIS_FX.VAR. If you overwrote this file without
backing them up they are gone. If you have them in project files and not
in global effects you can then just add them back into global by opening
one project at a time and pushing them into the global area. Then backup
the file PARIS_FX.VAR.

The default is just a backup of the original paris presets before we add
any.

john--
once again, thanks
i'm a slow learner i guess
even though i've been working with paris for 7 years or so...
cheers,
jp

I too have been working with paris for about 7 years and don't know jack.
 Even learning how the aux can be stereo was new to me and I have read the
manual in its entirety multiple times and continue to dink around in Paris.
 It's truly an amazing app.
