Subject: Any good Electronic Drum setups?
Posted by John [1] on Sat, 15 Apr 2006 13:35:21 GMT

I have a Trap Kat drum electronic drum set and think it's time to get a
new set. This one has 24 pads which allows for a great variety of drum
sounds but it has no windows program to configure the midi parts of it
and I have to use an external sound module (my motif keyboard) for the
sounds. To make matters worse, the sensors fail every 2 years. I've
had it for 7 years. So every 2 years they want $200 for a new film pad.

So...........

Is there an electronic drum set with lots of pads that is reliable?
Is there a windows midi interface program for it?

Ideally I want to have a couple thousand drum sounds in a library and be
able to EASILY build drum sets based on them, then easily switch drum
sets. I want to be able to easily configure the pan/volumes of each
drum in the set through a windows midi app. Can this be done?   Easily?
  This is 2006 for crying out loud.

Thanks.
John
