i have now get paris installed on pc/ with xp !!

it works THANK YOU AARON.

everything worked, but i have a little problem too:-(

i cant hear/see an signal in the mixer.

when i get in the audio window and push on the speaker icon for every single track i hear the signal.

then i add this single track to mixer window and i hear nothing and see no signal.

can anybody help me??

Is it possible that you have the audio outputs routed correctly in the patchbay but you didn't add the mixer object? If it's there you might try removing it and re-adding it, shutting down the pc completely and rebooting. The patchbay definitely needs to be setup right.

Make sure nothing is solo'ed or muted also and crank the faders up of course.

hy guys,

areally big thanx to john and aaron, my paris 3.0 is working fine with XP !!!:-))

exactly " i'am stupid !

before i get this paris i've used an old mec with an 8 in card and there i have never connect a patch from the MASTER mixer.

the only thing that i havnt is the response for the Challenge:-(

ok, i must send an email with my serial number to intelligent devices??

and they answer me with the response??

cherrz
