So my wife tells me it's time to get BLOW (Pro) Tools, since we run a commercial facility, and because Paris is OLD School, and low tech and such. Boo Freekin Hoo! So here's my list of COOL STUFF that's old school, and that's probably not as high tech as Pro Tools 8.?. The 57 Chevy. REAL Hammond organ. Wurlitzer Electric Piano. Hohner Clavinet. The Acoustic Piano, (what an OUT dated piece of junk!) the Rhodes, (hopefully they can keep the dream alive) Dave Smith? WOW, some one actually loves something that sounds REAL, instead of that contrived Digital poo poo that's so popular. Tubes. WHAT? The 52 Tele. The Horse. The Acoustic Guitar, the Human Voice. Women. Wood. Strings. Harmonicas.... Well, I'm done now cause it's Cinco de Mayo, and we're nearly out of Beer, (Digidesign doesn't have a new and improved digital version of that, "with plug ins" what ever will I do), so I hope my intoxicated Bla Bla only bothers those who need bothering! I like trees,(for burning), oops, for making houses and stuff. Love you guys! Long live Paris, long live 2" tape, kick stands, REAL girls, and dirt! Hardy freakin Har! Love John.
