Which begs the response: He looks bored, therefore he IS bored, which means I'M bored... he may be a great technician, but IMO he's got no feel whatsoever. I love to hear fast playing, but it's got have smoe enthusiasm behind it; Cory's post reminded me that he plays that way (on a couple of clips I've heard); and that kinda stuff is nice to hear, but this guy/kid does nothing for me.

Wouldn't be 'that' hard.. I'll stick a pair of my JBL's out on the porch, set up the ole audio/midi computer and tie it into my midi to light pack convertors that feed whatever lights I want. program up a coupla tunes, and let it rinse/repeat for a few hours every night.

Here's another possibility if you can't get to the security tab on a
folder or file

To display the Security tab
Open Folder Options in Control Panel.
Click Start, point to Settings, and then click Control Panel.
Double-click Folder Options
..
On the View tab, under Advanced settings, clear Use simple file sharing
[Recommended].
