In the early 1990's at the univ. I worked at, the IT guys tried to ban macs. If they found one in your dept. they would ridicule you and tried to enforce a "no mac" campus standard. They would talk about market share and comparisons to VHS vs. Betamax were tossed about freely.

In the mid 1990's, my wife's dept head actually banned macs from the dept.

Both the IT director and my wife's dept. head got canned, thankfully, but more importantly, let me be the first to declare the platform wars over.

Apple is now #3

<http://www.dailytech.com/Apple+Claws+Its+Way+Closer+to+the+Top+in+Retail+PC+Sales/article12409.htm>

Who'da thunk?

So, let me say to all the geek doomsayers and PC nazis

Bite Me. You were wrong all along. Get a life.

Apple has developed into the BMW of comp. companies. My new 8-core could not be more elegantly designed and built. Putting in more RAM was like working on a beautiful sports car and Leopard makes both Vista and XP look like bathroom grafitti in comparison.

Cheap? No, but worth it, and there really is no competition if you care about the things it offers.

Oh, and a guy from Apple spent hours with me sorting out my ethernet troubles.

Nothing against PC's, but the platform wars are over. You pays yer nickel and takes yer choice.

DC

oh and with VM Fusion, I can put XP over here and Leopard over there on the same machine and the same monitor. Or on mon. 2 of an extended desktop.

Ah, the plight of the brutally oppressed Mac user. I was working at a university in the mid-90's when we gently suggested that, since there were very serious questions as to whether Apple could continue as a going concern, it might be a good idea for Mac-centric departments at least diversify their platform choices. Just hedge a bit, with either *nix or Windows machines. For giving this excellent advice (still a good idea today) we were treated as platform nazis out to 'get their Macs.' Keep in mind at that point I was still writing a column for xlr8yourmac, not exactly a platform hater.

IT departments are charged with a different mission than home users. To this day where I work I don't tell people what computers, operating systems, and applications they can or can't use. It's not my job, or my place to tell them that, what I CAN tell them is what I can promise them I will support. I tell them that if they're running a laptop I set up with an operating system I know if it breaks I'll fix it. If they want to use Mail on a OS X or check IRC using emacs on a minix machine, more power to them, but I can't say for sure that I can fix things if they break.

But anyway, you're right, we're all out to 'ban' your Macs.

Reasonable advice. Zero chance of enforcing it on faculty as you discovered.

Fair enough. They have budgets and can pay for their own support.
You do realize the implications, right?

>But anyway, you're right, we're all out to 'ban' your Macs.

Hmmm.

The problem is you don't know how to fix a Mac and you don't want to know.

IT guys just want to stay in their F'ed up MS world, after all, that's where
the IT work is at. Feature wise, Macs are getting even better than they
were in the past, unfortunately, what's under the hood is getting easier
to break/hack. However, there is still no comparison between a Mac and a
PC when it comes to hassle factor and problems. That's why Mac guys are
willing to pay more for a Mac, why Pay some IT guy to fix what shouldn't
be broke, it always costs more. Don't worry, if Mac stay on the path to
become more like PCs, you may be needed after all.

And had our concerns actually come to pass, i.e. Apple going out of business
which was a very real possibility back then, guess who the faculty would
have come whining to to bail them out? We were giving prudent advice that
SOME people ignored and the rest got a little lucky.

As far as I can tell the implication is that I'm charged with giving world class support to my users, which I do. In return they trust that I will make good decisions for this organization about what can and can't be supported, within reason. That means that on the OS level I advise people not to have WORK machines that are Vista or OS X. Right now I have to be reasonably conversant in Solaris 8/9/10, two flavors of linux (SuSE and Red Hat), and CISCO OS. I also have to be fluent in Debian, Server 2k3, and Server 2000 and have projects on hand that are forcing me to learn SQL Server 2005 (in addition to the Oracle 9i db stuff we already have) plus at least basic C# and ASP.NET. Since there only 24 hours in the day and I still like to sleep, eat, make music, and get laid, I think I'd be doing a disservice to my users if I suddenly decided to learn a new desktop platform.

Again, what are these implications you speak of?

The people that ran around saying apple would be going out of business were the ones that would have benefited the most by Apple going out of business, MS zealots. Mac users about 25 to 35 million back in those days knew Apple wouldn't be going out of business, regardless to the all the vicious lies and false rumors. Some people believe that if you repeat a lie enough everybody will believe it. You can fool some of the people some of the time but you can't fool all of the people all of the time.

It wasn't good advice then and it still isn't now!

That is a lot of stuff to know, so what's another OS? As time goes on, more
and more people are going to start using Mac OSX, it wouldn't hurt to learn
it.

Hah! One man's luck is another man's foresight I guess.

We knew it was BS. We were right. Call it luck if you like.

Wow. But still, if a bunch of faculty want to use macs,
and they do, you either provide support or a nice
vendor will.

>Again, what are these implications you speak of?

Well in the case of the loudmouth IT guy and the PC
nazi dept head, it was unemployment.

The platform wars are over? Thank God, finally! I'm sure that's certainly an enormous relief for all of us.

Luckily for me where I work at the university my users are really concerned about support, and they are willing to trust that we, the IT group, will make smart decisions for them. A month or two ago the boss of bosses in my office brought his daughter's broken Macbook to work. Yes, Macs do break.

I spent a few hours on it at which point he said, 'Don't worry about it, you have more important things to do.' That kind of recognition is unusual in the IT world, but it's not accidental. Trust is built up over time with quality service most of the time and honest explanations when things occasionally go wrong. If your academic IT person had generated the level of distrust it sound like s/he did, then s/he deserved to lose the job. That speaks to their bad professional/personal skills, not to a computer platform.

Yeah, I know I am an optimist...

Still, there is little reason for them any more.

Sounds like a good place to work.

Yes, the IT guy was an idiot. He got a job driving trucks after that, and brought his big semi on to campus to show us all what a big shot he was in his new job... 'cept he high-centered it on the exit to the parking lot and phys plant had to spend the afternoon getting the semi off the ramp...

He somehow had worked there for almost a decade...

Amazing.

Actually MSFT sunk a couple hundred million into Apple and promised continuing
Office support, so the 'MSFT zealots' (which of course I'm not) if anything
were helping to keep power going to the life support system Apple was on.

While it certainly wouldn't 'hurt,' is learning another desktop OS really
the best use of my time? I'd say learning more about how OLAP cubes could
be used to calculate performance data for my users would do them more good.
If the people who sign my paychecks and award my bonus want Macs supported,
we can talk about that, but we run a very safe, secure, high performance,
low maintenance AD/XP network here. So far, my people seem to want me to
leverage that and work on custom db/dev work instead of troubleshooting Don's
NIC that couldn't autonegotiate a 100 mb/s connection.

>>
>>Again, what are these implications you speak of?
>>
>
>I think you are anti Mac because it fits in to the IT mentality, and I think
>you think it threatens your livelihood. More Mac, less IT guys needed.

Just because you can't run an efficient, reliable Windows network doesn't
mean that I can't. Precisely because desktop support and OS stuff is a
moving target, and prone to fashion, and a young man's game, over the past
few years I've been staking my livelihood ever more on networking (can't
outsource that to Bangalore), database programming, and recently other dev

work.

Yeah, the Apple guy was pretty embarrassed about that.
But he did figure it out and stayed with me until it was
sorted.

Gave me a good excuse to finally learn to terminate
Cat5/6 cables. Got myself a crimper and everything.
My cables rock!. I may stick a shield on the Cat6
stuff and try it on the guitar... Damn stuff is incredibly
low-capacitance...

heh heh

You guys should try to get along a bit more. Life is too
short to take a little net forum so seriously.

One of the biggest PC DAW advocates in town just bought a Macbook and an iPhone; he was on the phone to me completely stoked this morning, he was so excited about the new adventure. On the flip side, me - a Mac guy since '91 - I'll be leaning on him (and the community here) heavily when I set up my first XP-based PARIS rig. It's all over, we can all have the tools we need now, it's just a matter of choices - and all the choices are good ones.

The only part that really disturbs me is we don't have any good excuses left if we can't make music with these tools... :D

One real advantage the PC Paris guys have is the plugs that keep coming out. Dang!

Also, Paris works better when boosting levels inside the EQ on PC than it does on Macs for some reason.

Almost makes me miss Windows 95...

And I have to say... I got a free iPod touch (I gave it to my wife) engraved with her name on the back, with the Mac Pro.

You pay up front and get a rebate.

grrrrr...

You KNOW how that goes, and it usually involves many nasty phone calls and the presentation of various documents to various idiots and 6 mos. later you may get your check.

Nope. Just enter my Apple ID number on the website and they know what I bought and that I eligible. Punch a couple of buttons...

Rebate comes in 3 DAYS....

Yea for Apple customer service! 10 out of 10.

hahah, hilarious Sarah, you are right though. Mac users went on their crusade to convert all the pc users to their more expensive solution only for us pc users to not really give a shit.

to be fair i wish i started on a mac and paid the higher price but now i'm married to microsoft apps and won't be changing over anytime soon. but it was always funny how they were/are so passionate about a stupid computer.

I'm gonna convert you to my super zot 3 model toaster cuz all the other toasters suck and if you don't buy into my toaster you're an idiot

Super Zot 3 rules !!!

Actually it's better if everyone doesn't buy a single operating system. Competition is good, and there's not much left.

Cheers,
-Jamie

Oh, you nailed that one. If one or the other OS had "won" by eliminating the other, we'd be utterly hosed. The "other OS" is your best friend - or Macs would still have one button mice and menus that won't stay down, and PCs would still be copying and moving files from the command line.

Do you not remember just recently Kim asking that we do NOT post this kind of stuff here? It seems silly now but you know how quickly this stuff degenerates into very heated arguments so why not lets take the high road and not post this stuff here as KIM requested and use the other groups as intended?

John

If you will take notice, I didn't make the post, and I haven't started a thread on this subject in some time. If somebody else makes a post, then I think it's open to comment.

I take issue with the re-accounting of Mac user history in this case. One of the reasons Mac users evangelized the Mac, is because there was so much FUD about the Mac back then, and apparently there still is today.

Hey Mike,
Any chance of getting Paris to run on a Sinclair Z80???
I'd pony up!!
Kim

it appears the only folks interested in this thread are Apple users/lovers...
why not take it over to the general area and hack it out instead of cluttering
us up with spew about junkie Apple.

duckin

That's always the case ;-) It never ends but usually coincides with apple conferences.

An interesting phrase . . . if someone did, hypothetically, give a "flying fuck" about something, what might that look like?

I got a flying handjob once, which is better than a poke in the eye with a pointed stick but I suspect not as good as a flying fuck.

I use Windows, though, I'd bet Mac users get flying blowjobs, 'cause they're better.

TCB

Guys, my point was simply that we now know that Apple is not going away and that they continue to innovate, but mostly to tell a little story about my rockin' new overpriced Mac Pro.

NOT to start more of this...

Good grief...

DC
