This might sound stupid.. but which Paris's modules (in the Paris's Patching
zone - sotware-) should i connect together..? I got Mec Master-A 6/6
 MEC MODULES-A 16/16
 MIXER-A 16/4
 MIXER-A FX 16/16
 MIXER-A INSERTS 18/18
 MIXER-B 16/2

   Which of those should I connect.. so that I have my Paris's channels already
patched internally.. so i can patch them then exeternally?

        Thanks alot guys
