Is it just me, or are these demos *REALLY* bad...

I wouldn't spend a plug nickle based on the sound of those
demos...

David.

Horrendously hideous. It's not just you. These are embarrassingly, unbelievably
bad!!!

Yikes!!!

Well, to put it in technical terms . . . eeyyoo!

Why does anyone want this kind of junk anyway? Is it really that hard to
sing a few harmony parts? Jeez, send 'em over here. We'll harmonize the
sh*t out of 'em. :)

Yep, those are not so hot... you can build better harmonies in
Melodyne by simply cloning the lead vocal track, creating your
Melodyne files, then moving the notes into the correct harmony
intervals.
