Hi All,

It's been a good morning. :)

This is a debug version, so it will put a text file in your c drive. A release version will come as soon as I finish the project. This is for beta testers, really.

I think I fixed the multiple CPU issues relating to the C16. On my machine, it works without the "Toms Hardware" CPU utility enabled.

I think there is probably still an issue with the IF2, but I don't have one with me to track that down. I'll pick one up from my Dad's place tonight and test it soon. Anyway, here it is.

back up your copy of:
C:\WINDOWS\system32\PARIS_StudioControlLibrary.dll

replace it with the one attached to this thread.

Let me know how it goes!

Cheers!

Mike

On PC's with a C-16 you need to limit both the EDS driver and Paris to 1 CPU.
The C-16 will lock and stop functioning till you reboot the machine.

but

> will these developments effectively mean that I could have an increased
> range of PCs to potentially install PARIS onto?\

Yes

Doing the CPU affinity stuff will make it work now on current hardware.

Having Mike fix the drivers will hopefully make so that you don't have to jump thru hoops to make it work.

Pretty much all someone would have to worry about now is whether the new motherboard has PCI slots at all

Currently 2/3 slots, next gen is gonna be 1/2. So using a EDS card plugged directly into a current Mobo will be a 1 or 2 setup at most.

You will need to use a PCI to PCI-e expansion chassis to pull off a more than 2 card system.

Chris

Well, there's no way to fix that because it's Paris' software.... and that's
ID's domain (unfortunately). However, I do have to wonder.. Mike... with

multicore as a possibility is there some way to tweak the handling of the native plugs to be faster?

Way to go Mike, your are seriously rocking dude.....!!! Now if you could only come up with an "Auto latency Compensation" fix, it would be a perfect world. Sorry I dont have a multiple CPU setup so cant test. Keep up the great efforts.

Hi Aaron,

It really depends on the PARIS app, but I suspect that the plugins will be spread across all cores, which would be much faster. We'll have to test.

Cheers,

Mike
