WORKS GREAT WRAPPED.
YOU HAVE TO OFFSET THE TRACKS BY 8960 SAMPLES OR WHATEVER IT IS.
aFTER THAT YOUR GOOD TO GO.

Thanks, Brandon.
Wrapped means it does'nt work as a 'regular' VSt plug ? i need a wrapper,
correct ?

I believe it works but it cuts off part of the GUI if you don't wrap it. If
my
recolection is recolating properly. It might be a bit more stable wrapped as

well.

Brandon is correct about the GUI. The newest version only has 200 ms latency,
so it works great with Paris. Just hit the nudge 100 back button 2 times
and your good to go...sample accurate.

Here Don

http://www.knufinke.de/sir/index_en.html

hit the links page for impulses

Thanks Rod

I thought that was the place

Well, you download:

http://www.parisfaqs.com/wrapper33.zip

Extract the files and follow the instructions in the Readme33.txt
file...

Doug

http://www.parisfaqs.com

Thanks, i'll try.
