>BrandonHi,

Well it seems more people are interested in parts as opposed to a complete system. The only thing I worry about is ending up with a C-16 or MEC all by itself. Is there any interest in either of those or are people mainly wanting the I/O modules and PCI card?

Thanks

-eAll,

I currently own a PARIS 3 system:

- One MEC chassis with and additional 8 I/O card
 - One C16 c
