---=_linux46911f9b--I got a pair of Ultimate monitor stands for sale.

These are in excellent condition and perfectly functional. These are 36 inches tall. View pics here.

I am asking \$100 plus shipping.

These go for \$200 new.

Email me if you are interested.

Brandon_goodwin@sbcglobal.net

I have a Paris 442 interface for sale. We sold many Paris systems during their heyday and I discovered this unit in our warehouse. I have no way of determining if the unit functions. It has a little rack rash and was probably our display unit. The first 25.00 + shipping takes it-as is.

Contact me by email domenic@medley.net or call Medley Music 610-527-3090 and ask for Domenic

Thanks,

Domenic Troilo

Medley Music's out card is gone.

thanks Rod!

These cables from Markertek to isolate a MEC in a closet. There are 16 25 foot cables in all. The cable is Canare L4E6S Star Quad and the connectors are Neutrik. The color assortment on each bundle of eight cables is:

White

Yellow

Orange

Brown
Red
Green
Grey
Purple

What I was using as the input to the MEC was a bundle of eight female XLRs to TRS. What I was using as the output of the MEC was 6 TRS to TRS, and two female XLR to TRS.

The cables are in excellent condition, and cost me well over \$400. I'm offering them here for \$225 plus shipping. If no one is interested, they are off to the wilds of eBay.

ThanksEDS Card - make offer
C-16 black - make offer
MEC black (missing 1 plate front and back) - make offer

I love this system but its not used so if someone can put it to use, shoot me a email.Long story short -- one of my Event 20/20bas monitors died. I bought new ASP6s for surround. I found out from Event that they replac

cof42 (AT) earthlink.netHi

I am located in the Netherlands.
And i need a MEC before next weekend!
Anyone can sell me one asap?

Cheers,

DennisThis is an Underscore Electronics IsoBrick. It consists of 8 x 1:1 balancing transformers, each configured with a 1/4' input and 1/4" output. I bought it from some wanker on EBay back in March 2005. He did a crappy packaging job (this thing is heavy) and when it arrived, two of the transformers were broken loose from the chassis. I started looking around for somewhere I could get this thing serviced and finally called Jensen Electronics. They

said that they were familiar with this box, it had been discontinued for years and that the original owner of the company had become ill and had to close his operation down. Jensen had agreed to service his legacy products. Well, when all was said and done, I had shipped this to LA and had Jensen fit 4 x JT11 nickel core transformers in it to complement the existing transformers which are steel core trannys.

The original transformers are branded RE 7393 PC. I did some searching back when I first got this and saw some reference on the internet to Sowter but I can't say for sure if these are S

If you sent me a message previously, I apologize for any lack of response.

... here's what's left:

(2) IF/2 - \$25 each.

(1) ADAT MEC Card - \$195

(1) MEC - \$75

Plus shipping.

I also have an A8iT that functions perfectly in terms of audio but the signal LEDs on ch 1 and 2 aren't working. Yours for \$150 and shipping.

Please respond here or shoot me an email if you're interested.

Cheers,

Jon! I have one EDS card left if anyone can put it to use. Since PARIS is so rare, I'd much rather have someone using it than it just be sitting around.

If \$180+ shipping sounds fair to you, please email me.

Justin! I'd like to pic
