Not that I would call that watered down potting soil they sell coffee...

David.

If I don't finish these damnable proposals and get away from
this steinking computer soon!

GRRRRRRR!

DC

No wonder you're so messed up.... ;-)

David.

I hear you... I'm in the middle of prepping for a Stadium install...

David.

Cool! We did one of those a few years back. 22kw RMS, a huge center cluster just over the center field fence... fun stuff
I'm dialing it in during batting practice for the first game with baseballs dropping around me...

It's not a life, it's an adventure!

snork

Good luck with your project.

DC

:-) Yah, fun but stressful... this one is 45 EV XLD281's over center field in a CFL stadium...

David.

Wow! Big line array huh?

That's a big install.

I'd love to see some pics if you can.

Here's the sound tower of the one I spoke of:

This is a multi-part message in MIME format.

-----070505020502080206050000

Content-Type: text/plain; charset=ISO-8859-1; format=flowed

Content-Transfer-Encoding: 7bit

Here is a shot of the demo we did... that is me standing at centre field with 8 cabinets. All 45 boxes have to go in the "Sun" thing above my head...

David.

Seriously? You never even tried it in college? Even if you did not swallow? How come?

Wow!

Big place. Will you use scaffolding or does that enclosure come down?

I can only imagine the number of structural approvals needed for that project!

very cool. Let me know how it comes out. I love to fire up new systems. (hey waddy mean the mids are gone on the left??)

DC

I guess you need the extra long throat horns with the extra field width.

I've had a cup or two in my life, but I never liked it. Tastes like burnt food to me. Smells good, though. :)

S

The two towers you see on the other side contain winch motors and the whole mess gets lowered to the ground. The entrance to the cluster is on the underside, so we stop at about 8'. Currently it houses 24 JBL 15" front load woofers and 36 2445 drivers on standard lens'. This was a fine INDOOR PA in it's time ;-) but the weather has taken its toll over the years and it's now time for replacement. The trick was to find a solution that would keep the existing structure, and reduce the net weight load so we wouldn't have to go through re-engineering the towers and cables. The structure is about 20' across and 12' tall. We will be installing 5 sticks of 9 boxes each, one for each quadrant and one for north end zone coverage for special events and times where extra seating is set up (Grey Cup). We are using 23 EV TG7 amps (see attached) to power the system (and concourse feeds)... right around 85KW of output at the spec'd load impedance! Should be fun to crank up!! :-) The cool thing about these amps is they are completely auto-ranging from 100V to 240V... we will be running them on 208V Single phase power... no Neutral!

I will be taking pictures of the install as it goes. I will stick them up on our site and let you know when it's there.

David

Nice... what, about a 4 second decay time?? ;-)

It will be "fun" when it's finished!

David.

I'm glad the suspension system is already in and sorted out.

Save you a lot of grief. Looks like a lot of fun!

(isn't that weird to say? but it is...)

Look forward to seeing more on this install.

DC

Here's one of the ones I am working on now.

Nope. I was shocked. About a second RT60, and few flutters.
There is acoustical paneling all over the place. A very pleasant
room. How often do you see that??

We did a building by the same architect that looks just like
this, that was all marble and 4 seconds! Unbearable.

This one will be pretty easy.

I tried a sip once and didn't like it so I never pursued it. Over the many years I saw that it was pretty addictive and I'm messed up enough (as EK is bright enough to notice, hehe) so I didn't have any desire to try it even once more. I'll drink some caffienated sweet tea on the weekends sometimes and get really buzzed. haha

Even drinking one or two drinks of alcohol makes me sleepy really quick and hard to get up the next day. So, it's tropicana orange juice and aquafina running this powerplant. hehe

I do think coffee smells great !

John

actually that's the "secret" of their coffee, they burn the beans during the roasting process. personally i think their coffee sucks.

Good coffee tastes like it smells. Starbucks is one of the worst I've tried. To get great coffee, I have to brew my own - using a nonelectric ceramic drip pot. and boiling the filtered water and manually pouring it in. Couldn't get going in the morning w/o it. :) It did make it hard to give up cagarettes(15 yrs ago), they were so good with the coffee!
