Hello all!

I'm having some trouble getting going with Paris. It loads up fine but I can't seem to set up MIDI properly, so I had the idea of recording my MIDI in another DAW and sending the audio over via S/pdif, only I can't figure out how to do that either.

I've attached a picture to help me explain. Does anybody know what I'm doing wrong? It feels like I have a stripped down version of Paris installed.

Thanks,

Leigh
