Presumably due to some kind or karmic punishment, I'm being forced to purchase a fruit labeled computer for someone. I can't figure it out either. However, it seems _really_ hard to find deals on them. Is this me being an unsophisticated GNU/linux dweeb or does Apple actually have that tight of a hold on their retailers? If you suddenly had to have a cheap MacBook where would you buy it?

I've already warned the party involved that I won't be able to fix it when it breaks.
