I have acquired an old Digidesign/ProTools SBS DD007/MH477 7 slot PCI expansion chassis. Anyone know if this might be compatible, with the proper host and expansion cards, with a PC to run PARIS EDS1000 cards?

Thanks
Gregory McNeer

Hi there.
It's probably a rebadged Magna Chassis.(Not 100% sure about that). But if that's the case, it should be fully compatible.
Maybe someone can chime in and clarify. In any case, It wouldn't hurt to try.
Cheers,
Kim
