OK DC,

You wanted to hear a bit of the dubs we were doing with that old Rickenbacker lap this so here 'tis. This was into my Lexicon Signature 284, output to the Lexicon 10" speaker cabinet mic'ed with an SM57 inside one of these.

<http://www.audiologyrooms.com/booths.html>

This thing sits in my CR and when the door is closed, you can crank a marshall stack to 11 and barely hear it outside. I found two of these down in Bloomfield NM that had been purchased by a friend at an auction. Got 'em both for next to nothing. Best studio iso booth I've ever (not) heard.
;o)
